**Sec + Exam
must be
taken
before June
2021**

Prerequisites:

While there are no official/defined prerequisites for the course, students are recommended to have two (2) years of academic and/or technical related experience and have a basic understanding and working knowledge of networking fundamentals:

- TCP/IP Ports & Protocols
- Networking topologies, technologies, media, and communication concepts
- Networking Devices & Device Operations
- Understanding of the OSI Model Layers
- IP addressing, subnetting, and supernetting concepts
- Cloud and Virtualization technologies and concepts

Students having completed the Network + certification or previous Intro to Networking/Network fundamentals academic courses suffice any course recommendations/pre-requisites
